

## Ryan White Reporting

eClinicalWorks gives providers with Ryan White funding the ability to capture and produce all required client-level data elements for RSR reporting to the HIV/AIDS Bureau (HAB). We can also update file formats to be compatible with other software systems such as CAREWare. Accurate and timely reporting to federal, state, and local agencies is the key to health center sustainability. Our RW experts consider staff roles and your practice's protocols in developing optimal workflows for program success.

### **Our Business Analysts help you:**

- Analyze and optimize workflow, and ensure proper documentation
- Build your on-site system and Project Plan checklist
- Plan and develop a complete training curriculum
- Customize workbooks
- Leverage eCW tools to manage Ryan White flowsheets, templates and Order Set

### **Our Business Intelligence Consultants ensure proper follow-through by:**

- Mapping and configuration of reports
- Validating processes to ensure that reports are ready for submission
- Identifying coaching opportunities for providers
- Assisting with Test File Submission

**Contact us today** to review your Ryan White program. **eClinicalWorks** will then provide you with a scope of work required.
